

Disclosure Message:

Futu Clearing Inc. offers broker-dealers, foreign financial institutions, or other correspondents (“Counterparties”) the ability, either for their own account or on behalf of their customers, to route orders for handling and execution and the ability to route and execute orders in securities that trade over the counter securities, often referred to as OTC equities securities.

Counterparties can enter orders to purchase OTCQX Best Market, OTCQB Venture Market, and the Pink Open Market. Transactions in securities classified as Grey Market, however, are restricted to closing transactions only. Grey Market securities are not traded on the OTCQX, OTCQB or Pink markets. The Grey Market is an opaque market where broker-dealers are not willing or able to publicly quote OTC securities given the lack of investor interest, company information, or regulatory compliance.

Securities trading in the Grey Market may be further classified as a Dark or Defunct Company and/or Caveat Emptor, buyer beware.

Please note Futu Clearing Inc. reserves the right to modify the list of eligible securities at any time without notice.
